

## SERIES RM | RATE-MASTER® POLYCARBONATE FLOWMETER

Model RMC  
10" scale,  
15-3/8" high

Model RMB-SSV  
5" scale,  
8-3/4" high

Model RMA-TMV  
2" scale,  
4-13/16" high

### BENEFITS/FEATURES

- Eliminate the need for troublesome conversions with direct reading scales
- Reduce installation damage and cost due to stainless steel backbone that absorbs piping torque
- Long operation life with durable, shatter-proof polycarbonate body
- High repeatability enabled by precision injection molding around a precision tapered pin
- Increased reading accuracy with special integral flow guides that stabilize float movement
- Save time with instantaneous flow reading with the presence of scale graduations on both side of the indicating tube

### APPLICATIONS

- Medical equipment
- Air samplers
- Gas analyzers
- Pollution monitors
- Chemical injectors
- Cabinet purging

### DESCRIPTION

The **Series RM Rate-Master® Polycarbonate Flowmeter** is a line of general use, direct reading precision flowmeters suitable for both gas and liquid applications. This series consists of 2" (51 mm), 5" (127 mm), and 10" (254 mm) scales that can be panel or surface mounted with optional precision metering valves. With a given series, the Rate-Master® flowmeter bodies can be instantly interchanged, allowing the piping to remain undisturbed, interchangeability of the ranges and easy cleaning.

## SPECIFICATIONS

|   |  |
|---|--|
| <b>Service</b>  | Compatible gases and liquids.  |
| <b>Wetted Materials</b>   | Body: Polycarbonate; O-ring: Neoprene and Buna-N; Metal parts: SS; Float: SS, black glass, aluminum, K monel, tungsten carbide depending on range. |
| <b>Temperature Limit</b>  | 130°F (54°C).  |
| <b>Pressure Limit</b>   | 100 psi (6.9 bar).   |
| <b>Accuracy</b>   | RMA: 4% FS; RMB: 3% FS; RMC: 2% FS.  |
| <b>Process Connection</b>   | RMA: 1/8" female NPT; RMB: 1/4" female NPT; RMC: 1/2" female NPT.  |
| <b>Weight</b>   | RMA: 4 oz (113.4 g); RMB: 13 oz (368.5 g); RMC: 29 oz (1105.6 g).  |
| <b>CAUTION:</b> Dwyer® Rate-Master flowmeters are designed to provide satisfactory long term service when used with air, water, or other compatible media. Refer to factory for information on questionable gases or liquids. Caustic solutions, anti-freeze (ethylene glycol) and aromatic solvents should definitely not be used. |  |

MOUNTING DIAGRAM

ACCESSORIES

| Model  | Description                  |
|--------|------------------------------|
| RKA    | Regulator kit for Series VFA |
| RK-RMB | Regulator kit for Series VFB |

**Regulator Kits**  
 Available as optional extras for the Visi-Float® Flowmeter models. Recommended for use where inlet air pressure fluctuates widely and constant flow is required. The regulator maintains a constant pressure differential of approximately 3 ±0.15 psig. Supply pressure must be at least 3 psig above the flowmeter discharge to operate. The standard regulator may be used up to 200 scfh.

## HOW TO ORDER

Use the **bold** characters from the chart below to construct a product code.
