EchoPod® DL34

Multi-Function Ultrasonic Liquid Level Transmitter

Application

The general purpose ultrasonic level transmitter provides continuous level measurement up to 18.0' (5.5m) with a 4-20 mA signal output, and is configured via our free WebCal software. The level sensor has 4 programmable relays with selectable hysteresis and failsafe logic. The embedded level controller can lower cost by replacing external control hardware. This non-contact liquid level sensor is ideally suited for corrosive, sticky or dirty liquids, and is widely selected for day tank, skid, IBC, sump and process tank level applications.

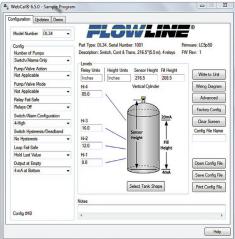

Features

- Level detection, switch and control functions up to 18' (5.5m)
- Configuration is fast and easy via WebCal software and USB adapter
- Narrow 3" beam width and short 8" dead band optimized for bulk tanks
- Four programmable relays for switch, pump or valve control and fail-safety
 - 1 pump or valve with 3 alarms
 - 2 pumps lead-lag with 2 alarms
 - 2 pumps duplexing with 2 alarms
 - 4 independent switch point alarms
- PVDF transducer and 6P polycarbonate enclosure for corrosive liquids
- Automatic temperature compensation for accurate measurement

WebCal® software is a free PC utility program that allows users to easily configure and test compatible Flowline level sensors to their measurement and control requirements. Download your copy and connect your sensor through our Fob USB® adapter.
